## HANGING GARDENS

Exercises at "Little Church  
Around the Corner."

### GROWTH OF CHRISTIAN CHURCH

Sabbath School Children  
Recite and Sing.

Neat Decorations—Arrival of Santa  
Claus and Distribution  
of Gifts.

The auditorium of the Christian Church—"The Little Church Around the Corner"—was full to overflowing last night, the occasion being the Christmas services of the Sabbath School. The room was not gorgeously decorated, but Mrs. George E. Boardman, in whose charge this part of the affair was placed, displayed her usual excellent taste. The space at the rear of the platform was concealed by a drapery, and when this was drawn aside, the hanging garden was exposed. This was not done until after the close of the exercises, then for the space of a half minute the electric lights were turned out, and when Supt. Weedon touched the button again a spontaneous burst of applause went up from little folks and big ones.

Three sides and the ceiling of the space were completely covered with palms and ferns, and in the center there was a pedestal covered with ferns and holding a large basket loaded with presents for the teachers and scholars. From the sides and ceiling were suspended toys, books, drums, cornucopias and boxes of candies, and as there was not room enough there to hold everything, the floor was pretty well crowded with heavier toys.

The exercises opened with a prayer by the Rev. James M. Monroe, followed by a greeting song, in which the entire school took part. Individual and class exercises followed in the order given below:

#### PROGRAM.

Greeting Song.....Entire School  
Greeting Recitation.....Jennie Cook  
Song—"The Wheel of the Year".....  
Classes of Mrs. L. E. Atwater and  
W. M. Templeton.  
Recitation—"Use of Time," Alice Hopper  
Song and Recitation—"The Christ in  
a Manger".....Primary Class  
Recitation—"The Vision".....  
Classes of Mrs. Atwater and Mr.  
Templeton.  
Song—"Christmas Carol".....  
Violet Carol Weedon  
Recitation—"Long Years Ago".....  
Miss Eva Matthews  
Song—"Ring, Shine and Sing".....  
Mrs. T. Dickson's Class  
Recitation.....T. McGuire  
Song, with Guitar—"Christmas Morn"  
Laura Lillis  
Recitation—"The Wise Men".....  
Miss Phoebe Harrison's Class  
Concert Exercise—"The Old, Old Story"  
Miss Alice Beard's Class  
Recitation—"Absent Ones".....  
Miss Louise Boardman  
Responsive Reading—"The Good  
Shepherd".....Chinese Bible Class  
Song—"Repeat the Story".....  
Chinese Bible Class  
Recitation—"The Pauper's Christmas  
Eve".....Miss Matthews  
Music and Songs.

The closing song was sung by Messrs. Berry, Templeton and Rice, with piano sleight bell and whip lash accompaniment. It was descriptive in character and told of the visits of Santa Claus to the little ones.

After this the presents were distributed as told above, and the exercises closed with a hymn by the children and a benediction by the pastor.

The scheme of the hanging garden was the idea of Mrs. Walter Weedon, and the children were drilled by her, assisted by the various teachers. Miss Roe of the infant class had her little charges to the front on every occasion, and they acquitted themselves with credit to her and themselves.

"The Little Church Around the Corner" was established here only a few short years ago by a half-dozen persons in the parlor of W. L. Hopper at his residence on King street.

A British man-of-war was in port when the matter was suggested, and Lieut. Silliman, one of the officers of a look active part in organizing. Rev. F. E. Garvin and wife were visiting here at the time, and when the arrangements were completed, and a tent was erected on what is now the Pacific Tennis Club's court, Mr. Garvin preached the first sermon.

From that time until today, ex-

cept during a very short interval when the services were suspended, the congregation has grown. When the church was built on Alakea street it was dedicated free from debt, the interior decorations having been finished by James Deas and paid for by the pastor not a great while before mid-night the night previous to the dedication.

A few months ago Mr. Garvin and his wife were obliged to leave for California, and was succeeded by the present pastor, Mr. Monroe. There has been no diminution in the attendance since this gentleman's arrival; on the contrary, the membership of the church and Sabbath School is constantly growing, and at a rate which indicates a larger church building before many years.

### "WELCOME HOME."

Reception to Mr. and Mrs. S. G. Wilder by P. T. C. Boys.

The P. T. C. boys gave a "Welcome Home" to Mr. and Mrs. S. G. Wilder at their country, Union Square, from 3 to 6 yesterday afternoon. The inclement weather undoubtedly kept away quite a number of people, but notwithstanding this, there was a large attendance. Tennis was not much of a feature on account of the troublesome showers, but the pleasant society of the ladies, who favored the boys with their presence and the music by the band, stationed on the Executive Building grounds, made the afternoon a very happy one.

Besides the guests of honor, there were present Mrs. Wilder, Mrs. Atkinson, Mrs. Herbert, Mrs. Noonan, Mrs. Tenney, Mrs. C. L. Carter, Mrs. Gunn, Misses Kate McGrew, Helen Wilder, May and Zoe Atkinson, Ella Stansbury, Clara Fuller, Pauahi Judd, May Hart, Kate Cornwell, Juanita Hassinger, Nellie Kitchen, Annie Kinney, Rose Roth, Belle Vida, Cora Angus, Lizzie Grace; Judge Hart, Marshal Brown, Dr. Cooper, Messrs. C. J. Falk, Armstrong Smith, R. W. Shingle, officers of the U. S. S. Alert and others.

### WAIKIKI DANCE.

Number of Friends Pleasantly Entertained by Mr. C. J. Falk.

The Waikiki home of Mr. Wilder was the scene of a very enjoyable dance Tuesday evening, given by Mr. C. J. Falk to a number of his friends. The Hawaiian National Quintette Club furnished the music.

Among those present were Dr. and Mrs. George Herbert, Mr. and Mrs. S. G. Wilder, Mr. and Mrs. C. A. Brown, Mrs. George C. Beckley, Mrs. Noonan, Mrs. Tenney, Mrs. Gunn, Mrs. Elizabeth Parker, Misses Helen Wilder, Cordeila and Belle Walker, Helen and Eva Parker, Juanita Hassinger, Kate Cornwell, Belle Vida, Messrs. Samuel Parker, David Kawanakoa, Jamie Wilder, G. P. Wilder, J. O. Carter, Jr., W. H. Cornwell, Jr., Charles K. Hyde, Armstrong, Jack Low, Drs. Murray and Grossman and a number of others.

Refreshments were served at a late hour, and at midnight the happy event came to an end.

### GENEROSITY.

Mrs. Irwin Distributes \$11,000

Among Charitable Institutions.  
From morning until evening yesterday Mrs. Wm. G. Irwin, whose generosity Honolulu has had many occasions to feel, busied herself with the distribution of \$11,000 among the charitable institutions of the city.

Beginning with the Queen's Hospital she endowed a bed and then distributed the remainder of the money among the charitable institutions, giving each its proportionate share, irrespective of religion or nationality.

Christmas presents such as the ones Mrs. Irwin has bestowed will not soon be forgotten.

### FRITZ MUST BE FAST.

An Eastern Authority Talks About the Australian Horse.

Regarding the proposed international light harness horse race the Spirit of the Times says:

"It will be recollected that in the spring of the year the Australian trotter Fritz broke the Australian record, and over a very poor half-mile track, in the third heat, distancing his competitors in 2 14 1-5. So convinced was his owner and his friends of the horse's superiority that a challenge was at once issued to any trotter or pacer in America to come to Australia and compete against Fritz. Here is the material part of the challenge. 'Talding the difference in tracks, I am positive

from personal experience that there is 10 seconds in favor of the American record, and that places Fritz about on equal terms with any trotting horse in America known at present. I think Fritz is the champion trotter of the world. Mr. Buckland thinks so as well, and to this extent: That if any man in America would like to try conclusions, say, a match for £2,000 a side, best two in three, the race to come off in Sydney on one of the registered courses, say Rose Hill, which is beautifully level and fast, there need be no delay in making the arrangements—bar none, pacer or trotter. Mr. Buckland is so situated that it would be quite impossible for him to visit America; neither would he consider an offer for Fritz. In fact, he informed me while in Melbourne that all the money the banks of New South Wales possesses would be no temptation for him to sell. Fritz, by Vancleve, dam Frau-lein, by Berlin, bred in the back woods of Australia, will trot any horse in the world for £2,000 a side and allow \$550 expenses in case of defeat. This offer is made by George M. Slate.

To this challenge Mr. Lewis G. Tewksbury responded, offering to back Robert J. and take him there, or to lay \$20,000 to \$10,000 on him if Fritz were brought to America. In accepting the challenge Mr. Tewksbury guarded himself with a number of conditions, which Mr. Slate was unable to accept, and he has so telegraphed. We hope this will not be the end of the matter. It is safe to say that the Australian sportsman believes that he has a great horse, and we believe he has. His idea is that the track over which Fritz made his record is fully 10 seconds slower than a good American track. It must also be borne in mind that Fritz distanced his horses very easily and came home alone, and the presumption is that if there had been anything to push him out his time would have been about 2:12. If the Australian's idea as to the handicap for the tracks is correct it would place Fritz close to 2:02. We think, however, that seven seconds would be far nearer the mark, which would bring him to 2:05, and even at that it would be anybody's race. We hope the idea of a great international race will not be allowed to die and that a list of conditions will be arranged which will be satisfactory to both parties."

### MOUNT EKA, MAUI.

(Written for the Advertiser and Hawaiian Gazette.)

Oh! misty mountain summits 'neath the blaze of tropic skies,  
That lift your crested foreheads to the sea-born breeze, that flies  
High above 'Iao Valley with its green and golden walls,  
Steeped in silvery hazes and the mists of waterfalls.

I long to be on your green heights again,  
Mid flashing of sunshine or shimmer of rain,  
I hear the sweet song the wanton wind sings,  
Trampling the heat with a magical spell;  
The voice of a bird in the far forest rings  
Resonant and clear as the voice of a bell;  
The new-born brooks as they ripple along  
In Nature's grand anthem the sweet notes prolong.

Oh! misty mountain summits when the morning sun illumines  
The ramparts, towers and pinnacles ablaze and flushed with bloom,  
All the heights are tipped with fire and the vivid golden glow,  
Sweeps down the mimic bastions to the valley far below.

I long to be up on the forested steep  
And see far away in the valley's green deeps  
The tangle of silver of swift running brooks,  
Humming low in the grasses or deep in the shade;  
Whirling in eddies in dim sheltered nooks,  
With broken reflections of leafy arcade;  
And blooms of the woods in the depths of them lie—  
In pools that have stolen their hue from the sky.

Oh! misty mountain summits when the twilight draweth nigh,  
And the fiery reds of sunset burn along the western sky;  
When all the heights are burning with a quivering crimson line,  
And the purple lights of evening have bedimmed the sea god's shrine,  
I long to be up on your green heights once more.

To watch the long swell on the surf heathen shore—  
To see the long slopes of the "House of the Sun,"  
Burdened and blessed with the bright waving canes—  
The palms nodding over the brook-lets that run.

And hew themselves pathways through gold brooded lanes  
In the slopes of the sand, 'Tis there I would be  
On this fragment of Paradise set in the sea.

CHARLES H. EWART  
Dalbeattie, Scotland, Nov. 1896

After hearing some friends continually praising Chamberlain's Colic, Cholera and Diarrhoea Remedy, Curtis Fleck, of Anaheim, California, purchased a bottle of it for his own use and is now as enthusiastic over its wonderful work as anyone can be. The 25 and 50 cent sizes for sale by all drug stores and Dealers; Benson, Smith & Co., Agents for Hawaiian Islands.

## ABOUT FILTRATION

Engineer Hering Chats With Board of Health.

### ESTIMATES COST OF THE PROCESS

Reports Received From Various Departments.

Only Usual Routine Work Done. Additions to the Great-er Evil.

At the regular weekly meeting of the Board of Health, held yesterday, there were present President Smith, Drs. Wood, Day, Howard and Emerson; Messrs. C. B. Reynolds, C. A. Brown, Kelliopio, T. F. Lansing and two visitors. The minutes of the previous meeting were read and approved.

Under the act to mitigate, Dr. Mon-sarrat's report showed 87 examinations and one Japanese added to the list.

Inspector Kelliopio's report showed 48,517 fish received at the market during the past week.

Mr. Meyer's report on the condition of affairs at the leper settlement on Moiokele, was read.

President Smith announced that he had received another letter from L. A. Thurston bearing on the matter of loss claimed by certain Chinese fishermen for the period during which they were prohibited by the Board of Health from fishing in the waters of the harbor. The claim for compensation was repeated, and \$447.50 was the estimate.

President Smith gave it as his opinion that it was a question of law and not one of discrimination of the Board.

After a short discussion on the matter it was voted referred to the Government.

At this point in the meeting Mr. E. S. Dodge came in with Mr. Hering, the engineer who arrived here on the last steamer from the Coast.

President Smith introduced Mr. Hering to the members of the Board, and then, after all had taken their places again, spoke to the engineer on the subject of filtration, a matter that just now is claiming much of the Board's attention.

Asked as to his opinion regarding mechanical filtration, Mr. Hering replied that as yet not much was known about mechanical filters. He was therefore somewhat in doubt about recommending them. Experiments were and had been going on in Louisville, Ky., for about a year. Here four or five of the best mechanical filters were undergoing a long series of experiments. Upon the manner in which those experiments turned out would be based the opinion of the engineers.

For a long time these mechanical filters have been used in the large manufacturing of the United States for the last 20 or 30 years for the simple reason that they produce clear water. The matter of the presence of organic matter is not considered at these places.

In regard to the mechanical filters it is not certain that they remove organic matter. No biological experiments have been made.

The conclusions reached by Mr. Weston, after experimenting with a small filter are the best in existence at the present time.

Mr. Hering then gave a short sketch of the workings of the mechanical filter. The water must run through it and to waste for 30 minutes before a gelatinous film forms at the top. Before this is formed only 60 to 70 per cent of the bacteria are kept out. After 97, 98 and even 99 per cent have been kept out. In some instances, however, where the film has been formed only 77 per cent have been kept out.

Previous experiments have not been conducted on the proper grounds, and that fact led to the experiments at Louisville with the Ohio River water.

President Smith: Aside from the mechanical, what systems of filtration are there?

Mr. Hering: There are two methods extensively in use. One is the continuous and the other the intermittent.

In the continuous method the water has to be put on filtration beds and kept at a certain uniform pressure. This is a very slow process as distinct from the mechanical method, which is known as rapid.

In the mechanical mode a column of 300 feet can be filtered, while in the

other process the limit is from 5 to 10 feet.

In the intermediate method a certain charge of water is applied and allowed to seep through. When that has disappeared another charge is put on. More filters are needed in this method on this very account. There is no continuous flow.

The air is drawn into the interstices and a vacuum is created. On the air that is drawn in depends the oxidation of the organisms.

These two, the continuous and the intermittent, are called the natural filters.

Mr. Hering spoke of the Morison "Jewel" filter as having done the best work among the mechanical filters.

Asked as to the material here for natural filtration, Mr. Hering said that he had not been here long enough to look deeply into the matter. He stated that there was no better material than quartz for filtration. Crushed glass would do the work well.

Purification takes place by the water percolating through the pores, which are partly filled with air. This enables the bacteria to do the work of decomposing the organic matter which are turned into nitrates. What is wanted is air, slow percolation on a large surface.

President Smith spoke about the water supply of the future for Honolulu, placing stress on the matter of artesian wells.

Mr. Hering then made some remarks as to cost of filtration. The continuous and intermittent methods would cost from \$7 to \$15 per 1,000,000 gallons, this including the interest on the plant.

The cost of the mechanical or the natural processes would be about the same. Mr. Weston's figure for the mechanical process in Providence, R. I., was \$7.86, including interest on plant, deterioration, etc. Mr. Hering said that he did not like to place the figure lower than \$10.

After a few general remarks, President Smith offered Mr. Hering all the assistance that the Board could offer him in the work which he had come to do in Honolulu.

The Board then continued to the consideration of other matters. The bids for supplies were opened, and the Secretary ordered to arrange and classify the same to be presented at the regular meeting to be held next week. A large number of tenders were received.

Dr. Emerson was authorized to publish in pamphlet form his compilation of Board of Health laws.

President Smith announced that in a letter received from Minister Cooper the latter had referred to his having been entertained by Dr. Brough of Boston, who took him aboard the Government boat Vigilant and explained the system of quarantine in force there.

At 4:45 p. m. the Board adjourned.

### HIT THE COLLECTOR.

Prince Cupid Resents Collector Lloyd's Request for Payment.

By an arrangement entered into some time ago the Dowager Queen Kapiolani agreed to pay the cost of lighting the Kapiolani Maternity Home for the period of one year. Some months the bill is paid on presentation and some months it is not, the time depending entirely upon the wish of the one on hand to do the paying.

This month it is Cupid Kalaniana'ole's turn to look after the bills for the Dowager's accounts, and yesterday young Lloyd, collector for the Hawaiian Electric Company, called for the severalth time, and was told to try again. He remarked that shoes cost money and pneumatic bicycle tires apt to explode, and requested the young athlete to settle. It was like a bantam and a Brahmin, for Lloyd is in the feather-weight class, and one swipe from Cupid floored him. Then Lloyd went to Manager Hoffman, and afterwards with him to the Marshall's office, where a warrant was sworn out for Cupid's arrest. He will probably have a hearing this morning. Manager Hoffman says he will collect the bill next time, and it will be at catch-weights.

### ABRAHAM LINCOLN'S HAT

There has been a lawsuit in the District of Columbia as to the ownership of the hat worn by Abraham Lincoln when he was assassinated. The claimants were the executors of the late Rev. Dr. Gunly, to whom it was said Mrs. Lincoln presented it, and the custodian of the Government museum in the house where Lincoln died. It was claimed on behalf of the Government that the hat had been taken possession of by the Judge Advocate General and delivered by him to the War Department, through which it finally came to the Museum. The Court decided that the suit to recover the hat was barred by the statute of limitations.

## CHRISTMAS TREE

Central Union Sunday School Given  
Christmas Entertainment.

IT WAS A VERY HAPPY EVENT

Large Fine Tree Laden  
With Presents.

Little Ones Given a Rare Treat.  
They Enjoy Music, Refreshments and Chatter.

Glad children's voices rang through the Sunday School rooms of Central Union Church last evening—voices with a note of expectancy ringing out distinctly above all the rest. Merry jodies skipped about here and there, dressed in dainty garments, and then as the time for the beginning of the Christmas entertainment drew near, settled down in their places, content to wait.

The Sunday School rooms were arranged much as they usually are on Sunday. The chairs were arranged in sections, and all facing the center of attraction, the large Christmas tree immediately in front of the platform. These chairs were all filled, whereas on the Sabbath day they are very often not in the same condition.

Each of the classes had its own place, and by the side of the children were the respective teachers.

The galleries and other available space were taken up by visitors. In all it is estimated that there were between 600 and 700 present in the rooms.

When all had quieted down a sharp click was heard, and the Christmas tree, a beautifully shaped pine from the side of Mount Tantalus, and standing over 15 feet high, was lighted up with a hundred red, white, blue and yellow incandescent lights.

The effect was calculated to make things more quiet than ever for a while, and then after a little ripple of pleased exclamation, hundreds of little hands sent forth an applause that lasted for a full half minute.

The tree was laden with strings of popcorn, trailing even to the ground, and resting here there upon imitation snowflakes. Hanging from the branches were dolls, bags of candy and other articles calculated to bring happiness to the hearts of the children. Most of the presents were piled in heaps on the platform back of the tree.

The flood of light that illuminated the room when the Christmas tree was shown in all its beauty, revealed more plainly to view the branches of evergreen clinging to the pillars of the room and upon these branches the imitation of snow and ice, so cleverly arranged.

The surprise of the Christmas tree having subsided, there was a song by the Sunday School. Then prayer was offered by Rev. D. P. Birnie. After this came a song by the infant class, and then a few remarks by Supt. De La Vergne, which closed with "Refreshments will be served." At this there was a round of applause.

While some of the gentlemen connected with Central Union Church were preparing the refreshments the intermediate class sang a song.

The accompaniments for this and the other two songs were played by Mrs. A. F. Judd.

It was not long before all were busy with ice cream and cake, and nothing but the click of spoons on saucers was heard.

While this part of the program was in progress Prof. Berger and an orchestra from the Hawaiian Band rendered pleasing airs from their station in the left-hand corner near the platform.

Then came perhaps the most interesting part of the program—the distribution of presents to the children, who with arms outstretched and faces all aglow with expectancy, received the gifts allotted to them.

After this nothing remained but the general good time that always comes at the end of such occasions. The little ones rambled about, embraced each other in their happiness, and were then taken off to their homes by their parents, all tired and sleepy.

MRS. SCOTT-SIDDONS.

Mrs. Scott-Edings, famous for a number of years as a dramatic reader and actress, died in France recently, and her body was shipped to New York. She had lived abroad in the latter years of her life in broken health.

Mary Frances Scott-Siddons was a lineal descendant of the great Sarah Siddons, her father, William Young Siddons, being the son of George, the eldest son of Mrs. Siddons. Mrs. Scott-Siddons was born in 1844, in India, where her father was a captain in the British military service. Here she resided until the death of her father, who died at an early age, when she returned to England with her mother.

She was sent to Bonn, where her education was completed. Six months later she made her debut in German comedy, and her performance was said

to have been remarkable for a child of her tender years.

On leaving Bonn she took up her residence at Winchester, where at the age of seventeen she met Lieutenant Scott, a young Irish officer to whom she was married in 1862. She had meanwhile been studying the Shakespearean characters, and succeeded in making her debut the next year at the Theatre Royal, Nottingham, in the character of Portia, in which her famous great-grandmother also first appeared upon the stage.

A successful engagement in Edinburgh was followed by a provincial tour, and in 1868 she gave a series of readings in London. Her success in this venture opened the doors of the Haymarket Theatre to her, and she made her debut on the London stage as Rosalind, a character in which her youth and beauty, and her illustrious name enabled her to achieve the greatest success of her career. Another successful provincial tour followed, and then she played Juliet at the Haymarket for thirty-six consecutive nights.

In the summer of 1868 Mrs. Scott-Siddons came to this country, and made her debut as a reader at Newport, R. I. In October of the same year she gave successful readings at Steinway Hall, New York, and finally made her first appearance on the stage in this country at the Boston Museum, as Rosalind. A tour of the country followed, Rosalind and Viola being the parts in which she generally appeared. In 1872 she returned to England, but soon came back to this country. She subsequently played in German in Vienna, and also made an Australian tour. Her later public appearances were chiefly as a reader, and for fifteen years past she had lived in retirement.

## A SHORT TALK ON BEING TIRED.

Are you a working man or a working woman? I don't mean one who is so by classification, or by having been born on the sinister side of certain lines of social cleavage, but solely because you daily do some sort of real, honest, and useful work? Yes? I shake your hand. I hope you manage to live by it without overdoing, and that (being still hearty and healthy) you sometimes find yourself tired, dog-tired, and hungry as a wolf, with plenty of good feed for supper. Then hey! for bed and a genuine sleep of eight hours; to jump from bed in the morning, both feet on the floor at once. That's the right kind of "tired" and the heaven-descended brand of rest. It is a blessing in itself, and bears others in its train.

But the variety of fatigue so many people are all the time writing us about is different. Listen to this one, for instance: "In September, 1893," he says, "I was overcome by a feeling of languor. I was easily tired and comparatively slight efforts served to exhaust me completely. Indeed, I never seemed rested at all, and was as tired in the morning as when I went to bed. Both muscles and mind were inert and relaxed. At the same time, my appetite seemed to be tired, too. I had no relish for food, and after eating felt uneasiness and distress in the stomach and pain at the chest. My skin was sallow also, and there was a dull aching at my right side in the region of the liver."

"I was constantly belching up a sour fluid, and my food would sometimes 'repeat' or rise into my mouth. All I could do to rectify this miserable state of things I did, acting upon the suggestion of friends and others, but failed to come across a remedy for my complaint, which meantime obtained a stronger hold upon me."

"On account of my inability to eat and digest food my flesh fell off until I became so thin you might have fancied me as having gone into a decline. And I was so weak I could scarcely get about. I remained in this condition month after month, unfit, of course, for work and virtually a man out of the world's fight."

"The doctor who prescribed for me probably understood my case, but he was not able, apparently, to cure me. And I notice it is in illness as it is in business; unless one holds his own he is bound to be falling behind, which made me anxious to obtain relief soon, lest I might pass beyond the reach of it. And in answer to the hope finally came the help I needed."

"In July of last year (1894) I read about Mother Siegel's Syrup in a small pamphlet which was left at our house. The book described my symptoms perfectly, and stated the disease to be indigestion, with dulness and inactivity of the liver, the latter condition a result of the former. The weakness and loss of weight it explained, naturally enough, to be the effect of want of proper nourishment. Cure the stomach trouble in such cases, said an article in the pamphlet, and the consequences will vanish of themselves."

"On this I procured a bottle of the Syrup from Messrs. Robinson & Co., chemists, Hunslet Carr, and after taking it for a few days, I found myself much better. My food now ceased to give me pain, and I gained some strength with every meal. No better proof of the power of this medicine could I ask. I continued the use of it; the bad symptoms abated and no longer troubled me, and in a few weeks I felt as vigorous and well as ever I did. I could work as before and experienced that kind of fatigue which promotes rest and is relieved by it. I have since enjoyed good health, and you are welcome to publish this short account of my case. (Signed) Percy Hardaker, 42, Woodhouse Hill Road, Hunslet Carr, Leeds, March 29th, 1895."

Mr. Hardaker is agent for the Pearl Assurance Society, and is well and widely known. His own intelligent comments on his complaint renders any words of ours quite needless. In private conversation he said he looked upon that unnatural "tired" feeling as a warning that none should neglect. It means, not the effect of work, but of exhaustion through that subtle disease indigestion. Mother Siegel's Syrup should be taken then, as he would have taken it then had he heard of it. We hope Mr. Hardaker's timely words, based as they are on an instructive experience, will be heeded by all to whom they apply.

## SAFE!

In case of fire keep cool, for if your valuables are in a Victor Safe you will recover them. Don't worry if burglars break into your office or residence, for they cannot break into your Victor Safe, if you possess one. If not, why not? Read what Ex Governor Jarvis of North Carolina has to say about them in his letter to the manufacturers:

Greenville, N. C., Feb. 26th, 1896.

The Victor Safe and Lock Co., Ctn., O. Gentlemen:—I am pleased to say the Victor Safe you sold me some five or six years ago, preserved intact all of its contents in the late fire in Greenville, on the 16th inst. The safe stood at a point in my office in the Opera House Block, that must have been one of the hottest parts in the great conflagration. It contained papers and other things of value. When it was taken out of the ruins and opened some twelve hours after the fire, everything in it was found to be safely preserved and in good condition. I cheerfully make this statement of facts in recognition of the valuable service rendered me by your safe, and you are at liberty to make such use of it as you may see proper.

Yours truly,

THOS. J. JARVIS.

In another testimonial, T. F. Harrison of Citra, Fla., says: "On the night of Nov. 8th, 1894, I put a No. 4 Victor Safe in my store at 6 o'clock, and at 11 o'clock that night my store was burned, and the safe was red hot from 11 to 6 o'clock or about that length of time. The door was opened, and the books were all in perfect state and all the money was in good shape. You need not hesitate to vouch for it."

We have these safes in three standard sizes at \$50, \$75 and \$110, according to size. The small ones being suitable for small country stores or for business agents, while the larger ones are just the thing for lawyers, or for people who wish to file away large numbers of valuable papers. All of the safes are fitted up conveniently inside, with drawers, pigeon holes and treasury vault. Come and take a look at them any way.

## TROPIC OIL

For Engines and Cylinders

THIS IS THE OIL that Plantation Engineers are calling for.

## 24 Sugar Mills

Are using the TROPIC Engine and Cylinder Oils, and we have yet to hear of a case where it has not given perfect satisfaction.

The TROPIC is a pure, unadulterated lubricator, and is fully warranted to be of the highest possible grade and to give first-class satisfaction in every particular. It is made at one of the best Oil Refineries in Cleveland, Ohio, and is shipped direct to Honolulu without passing through the hands of any Middle-men, and we sell in original packages, barrels or cases. The great success that the TROPIC OIL has met with, during the past season, ought certainly to recommend it for use in every Sugar Mill.

We have just received ex Bark "Edward May" a fresh supply from Cleveland, and can supply immediately, or at any time specified, any quantity required.

## HALL'S ALUMINUM CANE KNIVES

Are being used on over THIRTY PLANTATIONS. They are made by H. Diston & Sons of Philadelphia, and are acknowledged by them to be the best knives they ever turned out. They are made of Aluminum Steel, with Apple-wood handles, secured with four rivets, and hang easier in the hand, when in use, than any other Cane Knives. The fact that the cane cutters prefer these knives to all others, because they do not tire their hands, and they can do much more work in a day, is sufficient guarantee of their superiority.

We have just received over a hundred dozen from the Factory, and can supply Plantations now or at any time during the coming season. Plantations that have not yet tried them, should send for a sample lot, and give them a trial. We have them with the hook and without.

SEMI-WEEKLY.

W. R. FARRINGTON, EDITOR.

MERRY CHRISTMAS.

With political lines less sharply drawn, with the best of feeling existing in social and business circles, with no national calamities to mar this year's page of history, with a steadily growing confidence in our national institutions, our people have had time to look about them, to lend a helping and encouraging hand to the less fortunate. The spirit of philanthropy has awakened to new life, and many homes are today happier and better for the timely assistance that has come to them through public and unknown private channels. Though it is possible that the good things, the luxuries and the dainties of life, have not always been equally distributed—that will never be till the millennium dawns—there are very few if any in this land of ours who have not received a portion of the bounty, though it may seem ever so small. At all events there is no reason for listening to the whisperings of jealousy, or bemoaning social ills or discrepancies. It is a season when only the bright spots of the past should be brought to mind, the possibilities of the future forgotten for a time in the good cheer of the present. Let the dead past bury its dead, if this is a necessity of happiness; let the future take care of itself for one day at least; let the world wag as it will; let the people of this land join in making the opening day of the holiday season a bright and merry Christmas.

The "Calendar of the Free Kin-

The free-kindergarten has become so thoroughly established in the educational world of this city that it seems hardly possible that the first free-kindergarten was ever started so recently as 1892. The work was first taken up by Frank W. Damon in con-

The San Francisco Argonaut, in forecasting the work of the present short session of the Fifty-fourth United States Congress, says: "With tariff legislation out of the way, it is probable that the greater part of the time of Congress will be taken up with dabbling in the affairs of foreign countries. The Hawaiian Govern-

ment has sent H. E. Cooper, Minister of Foreign Affairs, to Washington, in the hope that Congress will act favorably upon their prayer for annexation. Emotional Congressmen are already preparing to make a plea for the Cubans and the Venezuelans. In fact, the affairs of insignificant foreign countries seem to them more important than the affairs of this country, for which they are paid to legislate." The Argonaut is very much mistaken as to Minister Cooper's "mission" to Washington, but we can forgive that as a very poor guess. Action on annexation is not anticipated during the life of this Congress. Yet Hawaii will make a plea for annexation, not for insignificant Cuba or Venezuela, when the next Congress convenes in December, 1897. At present we are told that Hawaii is a "sacred spot," and that the Hawaiian people are "not to be disturbed," wherefore the Hawaiian people will be relegated to the Congressmen's waste basket, as our Cuban friends are.

Returns from the seat of war in Cuba are such that the sugar factors are not reckoning on the Cuban crop for the coming season. Willett & Gray's circular says that now the Spanish have "prohibited all grinding of cane until the month of February, which they set for overcoming the rebellion, it is quite certain that no sugars will be made before, and they may be mistaken about February, if they may be right, but not in the war expected." The estimate for the world's production places the Cuban crop at 100,000 tons. "This is subject to such corrections as may be necessary. If the war does not terminate so

The Sultan of Turkey and General Weyler, whose temporary residence is in Cuba, are about the only individuals now before the public for whom the Yule-tide flames will not burn right merrily. Since they are engaged in making turmoil on earth and war among men the feeling of sympathy toward them will not be of a world wild character.

Professor W. F. Wagner finds that with an ordinary printing press and wood cuts or similar relief engraving all kinds of pictures and diagrams may be printed upon sheets of transparent gelatin in the same way that they are now impressed upon paper. The prints thus made are ready for use as lantern slides without any further preparation and can be produced for a few cents

## A CHRISTMAS MESSAGE.

## SOUTH WIND—FRAGRANT WIND.

Bear my message for me—  
Bear it afar to the distant lands.  
Bear it across the surging sea,  
O'er dark green waves from far off strands—  
South wind, fragrant wind,  
Bear my message for me.

A Christmas greeting bear across the main,  
To homes where falls the snow;  
Go tell our friends and loved ones once again  
The story all should know—  
The story of the thorough Christian life,  
The story of the peace that ends all strife,  
The story of the happy home and wife,  
Which makes all blissful here!

This send to those far distant homes we love,

To kin we may ne'er see

On earth. But whom we'll haply meet above,

When from this earth we're free.

This greeting speed from sea-girt Isles afar;  
This greeting speed from 'neath the tropic star;  
This greeting speed to friends where'er they are  
Upon this earthly sphere.

## NORTH WIND—ICY WIND—

Bring their message to me—  
Bring it afar from the distant lands—  
Bring it across the surging sea,  
O'er dark green waves to far off strands—  
North wind—icy wind—  
Bring their message to me!

Your message comes—I feel no breath of cold.  
What warms the icy blast?  
The blast that sweeps o'er bleak and sullen  
wold,  
With dark clouds overcast?  
Love sweeps away the chilling breath of  
frost;  
Love melts the coldest hate, ne'er counts the cost  
Love warms the world, saves those we count as lost.  
Love melts a heart of stone.

This Christmas greeting comes to Oahu's isle,

Across the heaving main;

It asks for merry dance and genial smile,

For song in sweetest strain.

This season brings the best of feelings forth;

This season tells of love and honest worth;

This season joins bright South and Stormy North.

Now Christmas rules alone!

## SOUTH WIND—FRAGRANT WIND,

You've borne my message for me—  
Borne it away to the far off lands,  
Borne it across the raging sea,  
O'er dark green waves to far off strands—  
North wind—icy wind—  
God bless your greeting to me!

ALATAU T. ATKINSON

## MOTHER GOOSE—AN AMERICAN A LETTER ON POSTAL CARDS

Mother Goose was a real character and not an imaginary personage as some people suppose. Her maiden name was Elizabeth Foster and she was born in the year 1665 in the County of Massachusetts Bay. She married Isaac Goose in 1693 and a few years later became a member of the old South Church Boston. The first edition of her melodies (which were originally sung to her grandchildren) was published in Boston in 1719 by her son in law Thomas Fleet. Mother Goose died in 1757.

Thirteen postal cards, delivered at one time to the Chief of Police of Kansas City, Kan. were found to be the first part of a letter the balance of which on twelve more cards came to him in the next mail.

Mr. Dana in a paragraph in a recent issue of the New York Sun said that Gen. Philip H. Sheridan was "the bravest man except one we ever knew." A correspondent of the Sun asked who was the notable exception and Mr. Dana replied that it was Custer.

## JACK FROST AND SANTA CLAUS.

(What a New England Boy Heard Them Say.)

Well, Old Uncle Santa, its near about time you were round among the girls and boys again! Got anything new for them this visit?"

"I could tell you heaps of things, Uncle Santa, I hear the young folks say about you, because I am around in places after you've made your calls. I hear them say that you left the sweetest little dollies and the cutest little cradles, and tops, and trumpets, and shotguns, and one said bicycles now a days, bigger than a boy can stride. It would make you warm all over, Uncle Santa, if you'd heard what two little girls in Boston were saying about you filling their stockings with candles and little pincushions, and shining lockets and chains, and one of them said: 'Right down where her big toe goes she found a real gold ring!'

"One little girl, though, Uncle Santa, said you left nothing in her stocking; and she said very likely it was because it was old and had a hole in it. Do you remember any stocking like that, Uncle?"

"Yes, Johnnie, I see and remember every little stocking that's ever hung out. Only, boy, some one too old and worn to hold what I put in. I used to say that the little girls with good stockings might lend one, for Christmas time, to poor little girls that have stockings with holes in them; but few of them liked that way, so I started a new way, Johnnie, and now I tell them, whose stockings let the things drop through, that I shall leave something for all of them at a Sunday School house in every town, where they can all go and get pretty things, and lots of cake and candy, too."

"I know, Uncle Santa, all about your last little scheme, and it's the jolliest thing you ever did. Why, I chanced to look in at two of your jolly Christmas trees; one was in London and the other in New York. I happened to be at those places the same time as yourself. It was the jolliest sight I ever saw!" I tell you, Uncle Santa, both the girls and boys opened their eyes at the trees with the candles lit all over them, and at the dolls dancing on branches, and a picture of your own self up in the trees, with cannons and glass marbles for the boys!

"What makes me remember it most was because I had spread snow all over the streets and fields the night before, and had put a good thickness of ice on the ponds, so that the boys you brought new skates for could run down and try them. Some of the boys, though, had their toes out of their boots, and some with no shoes or stockings at all, and I felt mighty ashamed at what I had done."

"Well, Johnnie, it is a little bad for some of them, but they like you all the same. Why, sometimes when I have given the girls and boys heaps of things, they forget all about them in a minute if you come along, and they rush out into the snow, shouting 'Hurrah! Jack Frost is here again!'

"Then you know, Johnnie, I go to countries that you never visit; but I never take skates there. Little Billy Thaw lives in those countries, and he never leaves Honolulu, which is a green little town upon an isle away down in the Southern Sea."

I guess, Uncle Santa, it is pretty nice in those countries but it is a lot too hot for me. I know Billy Thaw, for we met pretty often, and not always on the best of terms. Billy bothers me at times and he says I bother him by going where he says I have no right to go. Sometimes we come to blows, and drive one another up and down the Land.

I am glad you say Uncle Santa, that the boys and girls like me to come and visit you. I cannot always, but I always do if I can. I love to pop in just the same night that you go round, and hear the young folks wake up Christmas morning with the snow all sudden and bright! One visit I shall never forget. I came down last year from my chief residence in North Poleland and got as far as New Eng-

land late on Christmas Eve. Well, I knew a little town (you go there every year, Uncle Santa,) in the Connecticut Valley, where there are young folks, and old ones I've known for years. I said to myself, 'Now, I'll just give them a surprise!' The boys and girls were in bed when I got there, and little Billy Thaw, who had been about for months, had also a kind of dozed off. Well, I got some water that Billy had left and cooled it down very cold, and then I poured it slowly over the houses and trees, and cooled it, so that it couldn't run off, but laid in shining sheets over the roofs, and upon every branch and leaf. Then I threw snow over the houses and trees, yet so slowly that some of it tried to run away, but I stopped it on the edges of the eaves, where it hung in long necklaces of ice like crystals on a lovely maiden! Then, Uncle Santa, I spread snow all over the streets and fields and dropped handfuls on the gate posts and flowers, and hung the woods with festoons of ice! At dawn, when everything was finished and still, I heard the girls and boys about in their rooms, where I had tossed in little handfuls of snow through the windows left open over night. 'Hurrah! Hurrah! Hurrah! Hurrah!' and Uncle Santa, I'll never hear the like of it again! Down the stairs they all came, and out into the deepest snow. Sleighs were soon on the streets, and rushing to the jingle of bells; and, Uncle Santa, the young folks were hurrahing and singing:

"Three cheers for old Uncle Santa!  
And three for little Jack Frost!  
Who came at last in a canter!  
We thought little Jack was lost!"

CARDIGAN RUE.

Honolulu.

YOU CAN'T PLAY IN OUR YARD.

Here is the chorus of one of the most popular songs, as the author wrote it:

I don't want to play in your yard,  
I don't like you any more;  
You'll be sorry when you see me  
Sliding down our cellar door;  
You can't holler down our rain-barrel;  
You can't climb our apple tree;  
I don't want to play in your yard,  
If you won't be good to me.

Here is the Boston version of the same:

I don't care to indulge in any sportive  
recreation on the land about your  
dwelling;  
My affection for you has undergone the  
process of obliteration;  
You will regret your course when you  
observe me in the act of precipi-  
tating myself along the cover of  
the excavation under the house in  
which I have my residence,  
You can indulge in no vocal exercise  
whatever directed into the recepta-  
cle of rain water established by my  
parents;  
You shall not climb amidst the foliage  
of the trees upon which grows the  
succulent apple peculiar to our  
estate;

As I have before remarked, in effect, I do not desire to gambol on the ground surrounding your habitation in the absence of a sufficient guarantee that you will treat me with due respect, courtesy and kindness.

The balloon has become a marine life saving appliance. The big ocean greyhounds will soon, it is thought, be equipped with life boats harnessed to balloons so as to be practically unsinkable. This novel device has been patented by a shrewd Connecticut Yankee.

By virtue of a writ of Execution issued out of the District Court of Koolau-poko, Oahu, against Ahop (Chinaman) in favor of J. K. Paole, plaintiff, for the sum of \$33.35, I have levied upon and shall expose for sale at the Court House, at Kaneohe, Koolau-poko at 12 o'clock noon on Saturday, January 23, 1897, to the highest bidder, all the rights, title and interest of the said Ahop, defendant, in the following properties, unless said judgment and all other expenses be previously paid.

New Lumber Yard.

Allen & Robinson's new lumber yard is being laid out in the grounds back of the Hawaiian Electric Company's building, the place assigned by the Government. This is 200x400 feet, and will be used exclusively for redwood lumber.

That portion of Allen & Robinson's lumber yard on the Oceanic wharf side of the fence will be done away with entirely for the erection of warehouses. As soon as the new yard has been finished the lumber will all be trucked over.

To Light Mauna Loa.

At 7 o'clock this evening the electric lights of the Mauna Loa will be turned on, and the search light will be put into operation. This will be a good chance to see the facilities of the new boat.

LOCAL BREVITIES.

Minister Willis' condition was unchanged last night.

Dr. H. C. Sloggett, Beretania street, next Hospital, has a card in this issue. Owing to Friday being a holiday, the Gazette (semi-weekly) will be issued today.

Dr. C. W. Moore, Club Hotel, Beretania street, makes a specialty of diseases of women and children.

Col. J. H. Soper went around yesterday with a subscription list for a fund for "Lookout Charlie" at Diamond Head, and in a few hours raised upwards of \$250.

Collector General of Customs J. B. Castle has brought suit for the confiscation of the crackers and opium which arrived here recently, consigned to the Washington Feed Company. The case will be argued before Judge Carter today.

F. Wm. Thrum, the surveyor, left on the Kinau yesterday to be away about three months for the purpose of doing some work in the wilds of Puna. Mr. Thrum has been away on and off at work on the other islands for the past six months.

On Saturday, January 2d, 1897, at the office of J. Kaelemakule, Kailua, will be sold at auction under the provisions of the Land Act for Cash Freeholds, Government Lot, known as Lot 1 Puaa, N. Kona. On Friday, January 15th next, will also be sold at the office of E. D. Baldwin, Hilo, Lot No. 310 at Olua, containing 50 acres. At the same time and place will also be sold Lots 14 and 15 Olua, upon certain conditions. See Public Lands Notice in this issue.

Mr. C. M. Dixon, a well known merchant of Pleasant Ridge, Fulton Co., Pa., has a little girl who is frequently threatened with croup, but when the first symptoms appear, his wife gives her Chamberlain's Cough Remedy, which always affords prompt relief. The 25 and 50 cent sizes for sale by all Druggists and Dealers; Benson, Smith & Co., Agents for Hawaiian Islands.

MARSHAL'S SALE.

By virtue of a writ of Execution issued out of the District Court of Koolau-poko, Oahu, against Ahop (Chinaman) in favor of J. K. Paole, plaintiff, for the sum of \$33.35, I have levied upon and shall expose for sale at the Court House, at Kaneohe, Koolau-poko at 12 o'clock noon on Saturday, January 23, 1897, to the highest bidder, all the rights, title and interest of the said Ahop, defendant, in the following properties, unless said judgment and all other expenses be previously paid.

PROPERTIES  
55 1/2 bags of rice  
1 plow  
1 axe and pickaxe  
2 harness  
3 rakes

F. PAHIA  
Deputy Sheriff of Koolau-poko, Oahu

# THE CHILD STUDY

## The Wider Spread of Kindergarten Methods.

### THE CHILD AS A TEACHER

Physical Incapacities Must Be Carefully Ascertained to Effect Best Results.

"The most intelligent and persistent study that has been given to the natural history of childhood has come thus far from the kindergartens," says Prof. Earl Barnes, of the Stanford University. Now that this wave of "Child Study" is sweeping over the country, the kindergartens will have to look to their laurels, for the systematic study of the child is being taken up by—shall we say wiser and older heads? or by older heads that are striving to be wiser? People begin to realize that a child is something more than a mere nonentity; that it has been too long assumed that we give and impart to him all that he knows; that we are the ones he is to study, and we have wondered when our ends aimed at failed to meet our expectations. G. Stanley Hall says: "Alas! for the teacher who does not learn more from his children than he can ever hope to teach them." And our own dear teacher, Froebel, himself, has said: "Would you know how to lead the child in this matter? Observe the child, he will teach you what to do." Too long has this counsel been overlooked, but now that it is heeded, and having been tried in a very small way, it is found to be of inestimable value. The desire for means of pursuing "Child Study" is becoming what our detractors are pleased to call "a fad."

Only a very few years ago people would have jeered at the idea of forming a club with the sole idea of studying the individual child, and then comparing his characteristics with those of hundreds of other children in order that the teacher might better understand the material she had to handle. Yet today "Mothers' Clubs" and clubs for "child study" for the sole purpose of studying child character are being organized with the hearty support and commendation of men and women who are devoting their lives endeavoring to solve the imperfect educational problems of our times.

So much literature has lately appeared upon this subject from the pens of nearly all the leading advocates of this line of study that to minutely describe the system would be undoubtedly a waste of space; but for the benefit of those who have not had the opportunity to investigate the theory a light description of the course of work may prove of interest. The plan adopted by the student teachers of the California Kindergarten Training School may possibly best serve to illustrate the method in question, as it is being thoroughly and conscientiously pursued. Each student-teacher selects two children as subjects for continued study, recording in books kept for the purpose the different manifestations of character which occur each day. Once a week their reports are turned into headquarters, where they are assorted under the heads of sex, age, nationality and as nearly as possible their home environments, companions, occupations and social atmosphere. The result of this is to enable the teacher to have a more perfect understanding of child nature thereby preventing the tremendous waste of power which must necessarily occur when work of any kind is undertaken without a full knowledge of the principles involved. In nothing else can ignorance of law involve more woefully flat failures than in the training of a little child. When by means of these classes devoted to child study an enthusiastic interest shall have been aroused among parents, when every teacher shall realize that in a class of ten children she may have as many different temperaments and capabilities to deal with, and knowing how to handle the ten different dispositions to the best advantage is willing to do so, then and not till then will we have a perfect system of child education. Because some plans require a great deal of water it does not follow that all others are able to consume the same quantity, and yet the same amount of work is given, a class regardless of the capabilities of each individual child. It will probably take years before the full satisfactory effect of this new method of procedure will be felt in the educational world, yet a sufficient amount has already been accomplished to warrant the statement that in its influence upon the future status of both pupil and teacher it is of the greatest practical value.

Many teachers do not realize that eight-tenths of the children under their care are defective physically, but systematic child study has shown that out of five thousand (5000) pupils, between fifty and sixty per cent. were found to have more or less seriously impaired eyesight.

It was also discovered that in many cases the children whose eyesight was the poorest occupied the desks situated in the darkest part of the room, while the best seats were used by those whose eyesight was normal. Following this discovery of defective vision, seats were changed and the eye reached in a great degree. The tests were made with Snellen test cards, which were distributed among the pupils in the Sacramento M.H.S. The results of the physical examination of the children was also submitted to the parents, and the parents were informed of the condition of their child's eyes.

Next the attention was directed to the physical condition of the children. It was found that many of the children were suffering from various physical defects, such as rickets, scurvy, and other diseases, which were being treated by the parents. The results of the physical examination of the children were also submitted to the parents, and the parents were informed of the condition of their child's health.

As a result of this examination of hearing was as surprising as was the result of the sight tests, showing as it did a general average of twenty to twenty-five per cent. of defective hearing.

When we stop and consider that so many of the children in the public schools are suffering from their defective eyesight or hearing or perhaps both, and when we again consider the acknowledged stultifying effect that these misfortunes have upon the intellect, and when we also remember that prominent physicians assert that with proper care this number could be reduced to two per cent., who can but acknowledge that this systematic course of examinations resulting from child study is worthy of everybody's hearty support?

Aside from the examination of the physical conditions of the child, the students of the "Child Study," clubs earnestly turn their attention to the study of the child's personality. The Madison University, of Wisconsin, has sent out an invaluable syllabus of "Studies of the Moral Development of Children" and "Relation of the Child to Parental Authority." Parents who are willing to assist in the proposed investigation are urged to communicate with J. F. Morse. Aid from parents would be especially valuable, for in most instances they are far more capable of judging a child's disposition than the teacher, who sees them only during school hours.

The subjects of the syllabus to be considered are classified as follows:

First—"The Child's Relation to Parental Authority in Obedience. First Signs of Disobedience—Willfulness—Selfishness. Punishment and its Effects. Corporal Punishment—Other Methods of Punishment, the Manner in which Commands are Given, the Effects of Reward, Praise, Blame, Obedience from Love or Fear. Which Parent is Better Obeyed? Why?"

Second—"The Child's Attitude Toward Other than Parental Authority."

Third—"The Child's Natural Willfulness Toward Parents and Toward Other Children."

But, it is argued a teacher cannot be expected to know and remember every characteristic of each child. No, certainly not; but by thorough attention to known comparative results she can, if she will, be better able to estimate the capabilities and temperament of children of certain ages, and not, as is often done, give a child of seven the same work that is given to the child of ten. The work may be accomplished, it is true, but whereas the task is easy for the older child it is too difficult for the little one and the result is obtained at the expense of overstrained nerves and over-taxed brain. The effect of this "child study" system is as though a stone had been thrown into the educational mill pond; it has stirred its placid surface and gone clear to the bottom, while the ripples produced are reaching to the farthest shores of every land where the education of the child is at all considered.

The time is about past when a child is given so much to learn, whether or not he has the faintest idea of its meaning, and when if he can repeat it "word for word" he is supposed to have digested his literary meal. Froebel's methods will not now end when the child leaves the kindergarten, but will be carried throughout the child's school life—and let us hope throughout his whole existence.—Phil. Record.

## GAY NAVAL LIFE

Depends on the Officers' Age and Finances.

Duty on the Pacific, North Atlantic and Mediterranean Greatly Coveted.

The older men among American naval officers are generally finical as regards their sea-going assignments. By the time an officer has reached the rank of Lieutenant-Commander he has seen enough of the world to have become tired of the major portion of it. The enthusiasm of the cadet and of the Ensign has long since died within him. Ordinarily the chief wish of the older naval officer is that he be permitted to remain ashore for the longest time possible in conformity with the regulations. If, at the end of his three years of shore duty at the Navy Department, a navy yard or on special service, he continues to capture a berth on a receiving of shore ship, he is superlatively happy, for the three years thus spent is accounted a sea cruise by the department, and at the expiration of such a cruise, all of which is practically paid ashore, he is regularly detached presently as an officer who have been performing regular sea service during the same period, and is detailed to that job, where for which he may be available. He then gets what is practically six years of shore duty in a lump.

The differences of opinion among naval officers as to the relative desirability of the various stations are both peculiar and interesting. Those who have families, of course, prefer the North Atlantic or home station to all the others, for during the greater portion of the year, generally from early spring to late autumn, the war ships on this station either cruise about among the fashionable summer resorts that line the Northern Atlantic seaboard or are snugly tied up at the Brooklyn or Norfolk Navy Yard undergoing minor repairs, the protection of which is the greater possible length of time. The officers of the Atlantic station, of course, are not so fortunate, for they are constantly being shifted about among the various stations, and the only station that they can call home is the one to which they are assigned.

Next the attention was directed to the physical condition of the children. It was found that many of the children were suffering from various physical defects, such as rickets, scurvy, and other diseases, which were being treated by the parents. The results of the physical examination of the children were also submitted to the parents, and the parents were informed of the condition of their child's health.

Mare Island Navy Yard. Within the boundaries of this station there are probably more square leagues of sea than in any two of the other stations. It extends from the Behring sea on the north to Chile on the south and to the Hawaiian islands on the west. Generally, however, nearly all the vessels assigned to this station keep pretty closely to that stretch of the Pacific coast which lies between Puget sound on the north and Magdalena bay, in Lower California, on the south. In fact, there is comparatively so little service to be performed by ships of war on this station that many vessels often remain for exceedingly long periods at the navy yard at Mare Island under waiting orders. This is, of course, delightful for the naval officer who yearns not for the sea.

For very obvious reasons the blood of the Ensign or of the Junior Lieutenant tingles in his veins when the Bureau of Navigation decides to send him to a ship on the Pacific station. In the first place he has a chance to be within hitting distance of the city of San Francisco during his entire three years' cruise, and, as a good many of the younger naval officers have strongly developed bohemian instincts, they discover in the happy-go-lucky and occasionally somewhat lurid club life of the Golden City a peculiarly congenial field for working off their exuberant spirits.

Moreover, the festival of the Latin European countries has been developed recently and carried out with a high degree of skill and magnificence in the coast cities of Southern California. The people of the East have scarcely any conception of the splendor which attends these beautiful feasts of the flowers. All of the festivals, devised, and for the most part managed, by committees of the prettiest women of the festival cities, who have been elected by popular vote to so serve chiefly on account of their beauty, receive an official tone from the presence in the harbors of all the vessels on the Pacific station that are available for such pleasant duty. Old officers of the Navy say that one winter spent in Southern California in this lotus-eating fashion is sufficient to destroy for life a young officer's estimate of any other part of the world. Lastly, and perhaps most important of all, the marvelously beautiful islands of Hawaii are included within the limits of this station. Once having tasted the joys of shore leave in the city of Honolulu, the naval officer, whether he has one of four stripes to his sleeve, finds himself spoiled for the delights of most other cities.

The chief and perhaps the only drawback of this station is that one, and sometimes several of the vessels of the squadron is often detailed to patrol the coasts of Mexico and Central and South America. Naval duty off the coast of Central America is a thing to be dreaded for many reasons, the first among which is that the particular brand of fever produced down there is both dangerous and difficult to shake off, once the system has been inoculated with it. Then war vessels cruising on the west coast south of Mexico experience great difficulty in getting palatable, fresh provisions for the officers and men. Finally, the social conditions that prevail in the ports of Mexico and Central and South America are not of a sort to inspire naval officers with pleasurable expectations.

Of the foreign stations, the officers of all ages and degrees are pretty evenly divided in their estimates as to the relative advantages of a cruise among the ports of the Mediterranean and the comparatively slumbrous ease of three or more years' voyaging on what is known as the China station. In that considerable class officers in the United States Navy whose official salaries are eked out by private incomes the Mediterranean station is nearly always the first selection. It requires a good deal of money for a naval officer, whether he be Admiral or Ensign, to keep up his end on that station. It is a most undesirable station for officers who have families to support in the States and are obliged to depend solely upon their paymaster's checks. But for the unmarried officer who has a few thousand a year aside from his Government pay, there is a prodigious amount of joy to be extracted from a Mediterranean cruise. The commanders of war vessels on this station generally manage to steam their ships to the scenes of the celebrations and fetes, which are so frequent in the ports of Southern Europe. Even under ordinary circum-

stances entertainments, both ashore and aboard ship, are almost part of the daily routine. The dash and dazzle of life on the Mediterranean station enthralls the younger men and renews the youth of the old stagers, whose recollections of Algiers, Genoa, Nice and Villeneuve perhaps extends back to their "mildly" days aboard the "wind-jammers" of the old American Navy. The China station appeals to a large class of naval officers because it embraces the picturesque and hospitable Japan, is the cheapest of all the stations for the touring of naval officers. Includes agreeable and socially disposed American colonies in a great many of the ports, and finally is pretty free from the running about, except for vessels of the smallest class, which disturbs rest on the other stations. An assignment to the South Atlantic station is not regarded with unmixed joy by officers of the navy. They describe a cruise on that station as three years of unvaried boredom, relieved only by the excitement of the guessing when the yellow or Chagres fever is to make its appearance aboard ship. There is, in fact, a considerable amount of petitioning all the time by officers assigned to this station to get themselves transferred to stations in any other part of the world. These petitions, however, are not often regarded by the department, unless the condition of the petitioning officer's health is such as to render his further stay on the South Atlantic station impossible.—New York Sun.

Two men are reported to have started an extensive hog farm near Mobile, Ala. The animals are fed on refuse bananas, coconuts and corn. The green bananas are boiled, and the hogs like them much better than the ripe fruit. They will refuse corn any time when they can get bananas.

Washington Irving said, he supposed a certain hill was called "Rattlesnake Hill" because it abounded in—butterflies. The "rule of contrary" governs other names. Some bottles are, supposedly, called "Sarsaparilla" because they are full of... well, we don't know what they are full of, but we know it's not sarsaparilla; except, perhaps, enough for a flavor. There's only one make of sarsaparilla that can be relied on to be all it claims. It's Ayer's. It has no secret to keep. Its formula is open to all physicians. This formula was examined by the Medical Committee at the World's Fair with the result that while every other make of sarsaparilla was excluded from the Fair, Ayer's Sarsaparilla was admitted and honored by awards. It was admitted because it was the best sarsaparilla. It received the medal as the best. No other sarsaparilla has been so tested or so honored. Good motto for the family as well as the Fair: Admit the best, exclude the rest.

Any doubt about it? Send for the "Carebook." It kills doubts and cures doubters. Address: J. C. Ayer Co., Lowell, Mass.

## BIG COMBINATION

List of Names Suggested  
For Wilder Steamer.Kilauea Leads With Eighty Per-  
sons - Several Com-  
binations

When President Wight inserted an advertisement in the San Francisco Examiner inviting guesses of the name of the new steamer for the Wilder Steamship Company he did not take into consideration the fact that there are people here who are fairly good guessers.

California people were without a list of names of vessels in the fleet, and consequently a good many guessed that Kilauea would be the name of the new steamer; others thought it would be the Volcano. One gentleman with a taste for making name combinations hit upon "Kila-Wild" as a sure thing, believing that Kilauea and Wilder were good enough to form a name suitable for any vessel to steam in Honolulu waters. Others let their thoughts fall on heads of governments, ex-heads of ex-governments and politicians, but they were wide of the mark.

A Goldstein, living on Washington street, San Francisco, mailed a letter to Mr. Wight September 3, and guessed the steamer would be called the Helene. This person gave no reason for it, and it is supposed they had what is sometimes called a "hunch," or else it appeared in a dream. On November 29 Mrs. John McLain of this city, wrote a letter to Mr. Wight and named Helene, the daughter of Mr. and Mrs. W. G. Irwin as a suitable person for whom the fine steamer might be called. She gave her reasons and probably her guess was worked out on logical grounds.

These two were the winners of the prize offered, which was a trip from San Francisco to the Volcano and return. Mrs. McLain will begin her journey at Honolulu, go to San Francisco, and return to Honolulu.

Little Miss Irwin is popular in a very large circle of young acquaintances, and as she grows her popularity will increase and extend. Mrs. McLain evidently had this in her mind when she wrote out her guess, just as Mr. Wight had it in his when he moistened the gum on the flap of the envelope containing the mystic word, and locked it in a safe.

It is rather astonishing that out of 273 guesses but two should be correct. Following is a full list of names and the number of times each was sent in:

P. G., 1; Ideal, 1; Kaulana, 1; California, 1; City of Honolulu, 1; Pele, 1; The Republic, 2; Kate Field, 3; The Examiner, 2; Konah, 1; Sanford B. Beckley, 1; Hawaiian Republic, 7.

## AIR MOTORS FOR CARRIAGES.

For several months past experiments have been conducted at the American Wheelock Engine Company's works in South Worcester upon an air motor adapted to use upon hackney carriages, heavy wagons and private vehicles. These experiments and the work upon the motors have been carried on entirely independently of that on the compressed-air street car motors now building there for the Metropolitan Traction Company of New York. It is understood that the Metropolitan Traction Company is in no way interested in the motor carriages, although some of the individual stockholders of the Traction Company have been to a certain extent concerned with the experimental work. Like the motors for street cars, secrecy has been maintained in the experimental work in connection with the motor carriage and no one outside of the works and only a few connected with the establishment have been allowed to note the progress made. The work has all been in charge of an expert New York engineer who has himself done most of the designing and devising incidental to the application of an air motor to an ordinary vehicle.

The carriage has had several trials in the yard but not until last week was it taken upon the street and the public given an opportunity to witness it. They were not invited, even then. The carriage in general appearance much resembles the ordinary four-wheeled vehicle, expecting for

some experimental machinery visible underneath the body of the carriage. Its first appearance was made recently when it was subjected to a trial trip upon Park avenue, and from every indication it worked satisfactorily. President Hadley manipulated the power, and a party of men occupied the seats of which there are two. Pneumatically-tired wheels are used. In the trip, recently a speed of at least twenty-five miles an hour was obtained without any apparent difficulty.

It has been stated that those who are back of the carriage air motor intend in case of success which now seems assured, to form a stock company for the purpose of running a system of air motor cabs in some of the large cities of the country. The motor carriage constructed in Worcester is the first in which compressed air is used as the motive force. In all other motor carriages propulsion is obtained either by a storage battery or a miniature engine.—Worcester (Mass.) Spy.

## HENRY M. STANLEY TURNING BLACK.

Henry M. Stanley, the famous African explorer, is gradually turning black, as the result of having negro blood transmitted to his veins as a protection against the deadly malaria while he was traveling in the dark continent. It is a well-known fact that the climate of certain portions of Africa is extremely dangerous to foreigners, and as Stanley had to pass through the "fever country," he had a skillful native operator perform the operation of transfusing blood from a negro to his (Stanley's) veins. That the operation was successful cannot be doubted, as Stanley traveled repeatedly through that district without ever having the fever. His skins, which was formerly very fair, has now assumed a dark color, which is thought to be caused by the negro blood.—Berlin Letter.

## WORK OF PARLIAMENT.

During the existence of the British Parliament it has passed about 20,000 statutes, of which about 5,000 are still in force. Of these 3,300 were passed in Queen Victoria's reign, 151 date from Henry III, the first three Edwards and Richard II, 25 from the house of Lancaster, only 3 from that of York, 170 come from the Tudors, 69 from the Stuarts, 92 from William III and Anne, and 1,132 from the four Georges and William IV.

Don't be persuaded into buying liniments without reputation or merit—Chamberlain's Pain Balm costs no more, and its merits have been proven by a test of many years. Such letters as the following from L. G. Bagley, Hueneme, Cal., are constantly being received: "The best remedy for pain I have ever used is Chamberlain's Pain Balm, and I say so after having used it in my family for several years." It cures rheumatism, lame back, sprains and swellings. For sale by all Druggists and Dealers; Benson, Smith & Co., Agents for Hawaiian Islands.

## "Disfigured For Life"

Is the despairing cry of thousands afflicted with Unsightly skin diseases. Do you realize what this disfiguration means to sensitive souls? It means isolation, seclusion. It is a bar to social and business success. Do you wonder that despair seizes upon these sufferers when

Doctors fail, Standard remedies fail, And nostrums prove worse than useless? Skin diseases are most obstinate to cure or even relieve.

It is easy to claim to cure them, but quite another thing to do so.

CUTICURA REMEDIES Have earned the right to be called Skin Specifics—

Because for years they have met with most remarkable success.

There are cases that they cannot cure, but they are few indeed:

It is no long-drawn-out, expensive experiment.

25c. invested in a tablet of CUTICURA SOAP

Will prove most convincing.

In short, CUTICURA WORKS WONDERS

And its cures are simply marvellous.

SWIFT CURE TREATMENT.—Wash with CUTICURA SOAP, gentle application of CUTICURA Ointment, followed by mild doses of CUTICURA RESOLVENT (the new blood purifier).

Sold throughout the world. British depot: F. NICHOL & SONS, 1, King Edward Street, London, E. C. 1. LITTLE, IRWIN AND CHEMICAL CORPORATION, Sole Proprietors, Boston, U. S. A.

DR. J. COLLIS BROWNE'S  
CHLORODYNE.  
Original and Only Genuine.  
COUGHS,  
COLDS,  
ASTHMA,  
BRONCHITIS.

Dr. J. Collis Browne's Chlorodyne, Vice-Chancellor SIR W. PAGE WOOD stated publicly in court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR OF CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to. See The Times, July 13, 1884.

Dr. J. Collis Browne's Chlorodyne is a liquid medicine which assuages PAIN OF EVERY KIND, affords a calm, refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted. Is the Great Specific for Cholera, Dysentery, Diarrhoea.

The General Board of Health, London, report that it ACTS as a CHARM, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states: "Two doses completely cured me of diarrhoea."

Dr. J. Collis Browne's Chlorodyne is the TRUE PALLIATIVE in Neuralgia, Gout, Cancer, Toothache, Rheumatism,

Dr. J. Collis Browne's Chlorodyne rapidly cuts short all attacks of Epilepsy, Spasms, Colic, Palpitation, Hysteria.

Important Caution.—The immense sale of this Remedy has given rise to many Unscrupulous Imitations.

N. B.—Every Bottle of Genuine Chlorodyne bears on the Government Stamp the name of the inventor, Dr. J. Collis Browne. Sold in bottles of 1s. 6d., 2s. 6d. and 4s. 6d., by all chemists.

# WHEELS THEY RIDE

## Men Now in Training For H. A. A. C. Field Day.

Probability That Races Will Be Interesting—Honolulu Road Club Has a Good Team.

The 17th of January, or rather the 16th, for the former date falls on Sunday, is almost here, and the wheelmen are getting down into hard training for the events that come on that day. Ever since the bicycle feature entered into the athletic events of the H. A. A. C., there has been a steady effort to make it the most prominent one, and, indeed, with the constantly developing material that Honolulu is showing, there is no reason why this end should not be accomplished.

Most of the bicycle men are now in training and below will be found the complete list of those who are pushing their wheels daily out along King street.

Fred Damon and George Martin, who are riding the famed Rambler.

Tom King, with the Tribune as his choice.

John Silva the "Manoa Wonder," and D. G. Sylvester, who will push the Remington.

Frank Grace, the winner of the greenhorn race in the last H. A. A. C. field day events who will stick to the Cleveland.

Charles Murray, ever faithful to the yellow Stearns.

Damon, Martin, King, Grace and Murray are training together, and will represent the Honolulu Road Club in the bicycle events.

George Angus will probably not ride this year, a fact that will be a great disappointment to the bicycle men.

Silva and Sylvester, although riding the same make of wheel, are not training together.

Percy Lishman, who will also ride a Remington, will not go into training until after Christmas.

H. Giles has not begun training yet, but it is very probable he will ride in the races.

R. Bond will begin training soon. He will ride the Rambler, and will be in the H. R. C. list.

All that remains to be done now by those interested in wheeling events is to watch the indicator. The 16th will show which way the rooster turns his head.

## KAILI IN TROUBLE.

### Admits Theft of a Blue Serge Coat From S. Anno.

Poor Kaili testified against his pal Kane in the police court yesterday morning and helped him to get nine months, and now it is probable that he will keep him company on the reef, as he did in the burglary of various Chinese and Japanese stores in the city.

At the completion of the case of Kane yesterday the doors of the police station were opened and Kaili allowed to walk out upon the street.

No sooner had he reached the outer door than S. Anno stepped up to him and demanded "Where did you get that coat?" The hat part was all right.

Kaili was nonplussed and stood before the circle of officers who had already collected, as if in a state of coma. Anno repeated the question, and then pointed at the vest he himself was wearing. It was of the same material as the coat which Kaili had on.

In just a little while the thief had admitted to the crowd that he had stolen the coat. Then he was hustled back into his prison cell to await his doom in the police court today.

It is not likely that Kaili's plea will be anything but guilty, as he admitted the theft before so many people yesterday.

## AFTER OPIUM SMOKERS.

### Capt. Fernandes and Lieut. Kekai Raid Ho Sin Kee Building.

Between 7 and 8 o'clock last night Capt. Fernandes, Lieut. Kekai and two officers made a raid on the Ho Sin Kee building on Nuuanu avenue near the corner of King which resulted in the capture of Aswan and 11 other Chinamen in a room on the second story with opium smoking outfits galore and opium to the amount of a tinfal in all.

Capt. Fernandes and an officer climbed up on the top of the Merchants Exchange saloon and entered the Ho Sin Kee building from above, while Lieut. Kekai and the other officer kept guard below.

At the signal agreed upon, Kekai and his officer rushed up the stairway. They caught the Chinaman stationed in the passageway to give the alarm on an electric bell.

The Chinaman in the room above made a break for the back in the ceiling, but was seen scrambling down the ladder again by Capt. Fernandes and his officer.

By this time the Chinamen were in

a perfect tumult. Both avenues of escape were blocked by officers and there was nothing to do but to take their arrest quietly.

The opium and smoking outfits were gathered up and Aswan and the other 11 marched to the police station. Upon being searched, Aswan was found to have about \$100 on his person and another Chinaman \$500 in gold. This money was used to bail out Aswan and Aswan signed for the remaining six.

This is the third time that Aswan's place has been raided. It is fitted up with an electric bell and a large horn used as signals of danger.

The officers can well congratulate themselves on getting into the building, as it is one of the most difficult of access in the city.

## MORE OKOLEHAO.

### Native Moonshiner Captured in Palolo Valley Tuesday Night.

At midnight Tuesday, Marshal Brown, Detective Kaapa and two officers might have been seen creeping along in Palolo Valley under a very threatening sky.

They were after Piplani, a native, who has for some time past been in the business of distilling okolehao.

Shortly after the time mentioned, the Marshal and officers entered Piplani's house just as the rain came down in torrents. The whole family was asleep, but Piplani was the only one wanted, and the remaining ones were allowed to slumber on.

On the premises were found a gallon demijohn of okolehao, and a whole distilling outfit. The fire which had evidently been used in making the okolehao in the evening had all but gone out.

In the police court yesterday morning Piplani pleaded guilty and was sentenced to three months imprisonment and to pay a fine of \$100.

## SHIPPING INTELLIGENCE.

## WHARF AND WAVE.

The bark Samoa has been chartered to load sugar for New York.

The Mauna Loa hauled alongside the Oceanic wharf yesterday. She will sail on the Maui and Hawaii route Tuesday, December 29th.

Before leaving for San Francisco on his last trip, Capt. Seabury of the China said that if he could not bring her China in before 3 p. m. Christmas day he would not spoil anyone's Christmas dinner meaning that he would not be in until late.

The gas engine which in Europe has almost supplanted the steam engine for moderate power, is being used in France for ships. A new gas boat on the Havre-Rouen-Paris line is 100 feet long, with 7 feet draught, and attains a speed of 7 knots. The gas is stored in steel tubes under a pressure of 95 atmospheres. The engine is 2-cylinder one, and is of 40 horse-power.

A "Message from the Sea" was picked up on one of the Friendly Islands near Lifuka, in the shape of a bottle thrown overboard by a resident of Samoa, who was a passenger by the Alameda in February last. The enclosure contained the words "Alameda February 22d 300 miles from Samoa." Unfortunately for the information of scientists who take an interest in the direction of currents neither latitude nor longitude were given. Samoa Herald.

At the signal agreed upon, Kekai and his officer rushed up the stairway. They caught the Chinaman stationed in the passageway to give the alarm on an electric bell.

The Chinaman in the room above made a break for the back in the ceiling, but was seen scrambling down the ladder again by Capt. Fernandes and his officer.

By this time the Chinamen were in

## NOTICE TO MARINERS.

United States Branch Hydrographic Office Merchants' Exchange.

San Francisco, Cal.  
Captains of vessels touching at any of the ports of the Hawaiian Islands, by communicating with the Branch Hydrographic Office in San Francisco, will be furnished with the Monthly Pilot Charts of the North Pacific, and with the latest information regarding the dangers of navigation in the regions which they frequent.

Nautical inquiries will be investigated and answered.

Mariners are requested to report to the office dangers discovered, or any other information which can be utilized for correcting charts or sailing directions, or in the publications of the Pilot Charts of the North Pacific.

W. S. HUGHES,  
Lieutenant, U. S. Navy, in Charge.

## ENGRAVING

## STEREOTYPING

AT THE GAZETTE OFFICE.

## BY AUTHORITY.

The following gentlemen have this day been appointed Commissioners of the District of N. Kona, Island of Hawaii.

J. Cooper  
P. Born and  
J. Kaelemakule  
J. A. KING,  
Minister of the Interior  
Honolulu, Dec. 17 1896  
1821-31

## DEPARTMENT OF FINANCE.

Honolulu, H. I., Dec. 15, 1896.

Under Article 35, Section 1 of the Constitution, it is required that each member of the Cabinet shall make an annual report of transactions within his department, during the year ending December 31st.

The Minister of Finance takes this occasion to request all those having claims against the Government of a monetary nature, to present them to this office through the proper department, not later than 12 o'clock noon on Thursday, January 14, 1897, after which date the books of this department will be closed.

All persons having moneys on account of the Government are requested to make their returns promptly, in order that there may be no delay in closing the accounts for the year ending December 31, 1896.

S. M. DAMON,  
Minister of Finance.  
4484-2w 1821-3w

## SPECIAL TERMS AND CONDITIONS (OPTIONAL)

One-fourth of the purchase price to be paid immediately after the sale, and the remainder in equal installments in one, two and three years thereafter, with interest annually at the rate of 6 per cent, but provided that the purchaser may pay any such installment before it is due, and thereby stop the corresponding interest.

Purchaser shall begin substantial improvement of his lot during first year, and during succeeding two years and shall have at the end of the third year 25 per cent of the land under bona fide cultivation.

Additional Improvements (to the value of \$500 for lots over 50 acres and \$250 for lots under 50 acres) to be

made in the way of buildings, by the end of the third year.

An average of 10 timber shade or fruit trees per acre to be planted or maintained.

An agreement covering above conditions shall be made with the Government, and no assignment under such agreement shall be made without the written consent of the Commissioners of Public Lands.

At the end of three years if all conditions of the agreement have been substantially fulfilled, the purchaser shall receive a fee simple title to the land.

In case of default for failure to perform the required conditions, the Commissioners may take possession of the premises, and may sell the same at auction, either as a whole or in parcels, for cash or on terms of time payments; and if such sale result in advance on the original price, the original purchaser to receive therefrom the amounts of his payments to the Government on account of purchase, without the interest, and a pro-rata share in such advance in proportion to the amounts of his payments. If such sale shall result, however, in a less price than the original, the amount returnable to him shall be charged with a pro-rata amount of such decrease to the amounts of his payments.

All applications must be made at the office of the Sub-Agent, Charles Williams, at Honokaa, on or after the date given above.

First application received for any lot will determine the system under which such lot will be taken.

## QUALIFICATIONS.

All applicants or purchasers must possess the qualifications and make the sworn declaration, as required of applicants, for Rights of Purchase Leases and Cash Freeholds.

Plans of the above lands and further information may be obtained at the office of the Sub-Agent, at Honokaa, or the Public Lands Office, Honolulu.

J. F. BROWN,  
Agent of Public Lands.  
Dated December 11, 1896.  
1820-5w

## PUBLIC LANDS NOTICE

On Saturday, January 2 1897, 12 o'clock noon, at the office of J. Kaelemakule, Kailua, will be sold at auction, under the provisions of the Land Act for Cash Freeholds, Government lot known as Lot 1, Puua, North Kona. Area: 8.73 acres.

Upset price, \$34.92.

On FRIDAY, January 15th, 12 o'clock noon, at the office of E. D. Baldwin, Hilo, will be sold under the provisions of the Land Act for Cash Freeholds, Lot No 310 at Olaa, containing 50 acres.

Upset price \$300

At the same time and place will also be sold Lots 14 and 15, Olaa, containing 100 acres, upon the following conditions viz

Upset price \$600, one-fourth purchase price to be paid on day of sale and remainder in equal installments in one two and three years, with interest at the rate of 6 per cent per annum.

Cultivation and improvements to be begun during the first year and continue during succeeding two years. Twenty-five (25) per cent of the land to be put under cultivation and other improvements of the value of \$500 to be made before the end of the third year. At the end of third year, if full amount of cultivation and improvement has been made with full payment of purchase price and all conditions to such date fulfilled, a Patent Grant for the premises will issue.

All applicants or purchasers must possess the qualifications and make the sworn declaration, as required of applicants for Rights of Purchase Leases and Cash Freeholds.

Full particulars can be obtained at the Public Lands Office, Honolulu or at the office of the Sub-Agent in Hilo.
